

FOR IMMEDIATE RELEASE

Healthcare IP Achieves EHNAC Healthcare Network Accreditation

HNAP accreditation ensures adherence to health data processing standards and compliance with security infrastructure and integrity requirements

EDMOND, OK – August 3, 2017 – Healthcare IP, an innovative leader in healthcare technology, announced today it has achieved full accreditation with the Healthcare Network Accreditation Program (HNAP) for Electronic Health Networks (EHN), from the [Electronic Healthcare Network Accreditation Commission](#) (EHNAC). EHNAC’s HNAP accreditation recognizes excellence in health data processing and transactions, and ensures compliance with industry-established standards and HIPAA regulations.

Through the consultative review process, EHNAC evaluated Healthcare IP in areas of privacy measures, systems availability and security infrastructure. In addition, EHNAC reviewed the organization’s process of managing and transferring protected health information and determined that the organization meets or exceeds all EHNAC criteria and industry standards. Through completion of the rigorous accreditation process, the organization demonstrates to its constituents, adherence to strict standards and participation in the comprehensive, objective evaluation of its business.

“An organization’s decision in taking the necessary steps to ensure trust within its stakeholders and customers that they’re adhering to the latest standards in privacy, security and confidentiality is an important accomplishment in this time of heightened regulatory concerns,” said Lee Barrett, executive director of EHNAC. “Attaining EHNAC HNAP accreditation, as Healthcare IP has, requires companies demonstrate full commitment to ensuring the security and privacy of health data processing and transactions for their customers.”

About Healthcare IP

Healthcare IP is a leader in integrated clearinghouse processing and intelligent RCM solutions for healthcare. Our clients range from larger academic medical centers, hospitals and health systems to larger group practices. We combine industry leadership experience and advanced integrated technology with our collaborative client development approach, allowing our clients to operate more efficiently and improve patient financial services and RCM performance within their organizations. Our commitment and passion for client success is seen throughout our company, and many of the more respected names in healthcare trust our work and are clients of Healthcare IP.

About EHNAC

The Electronic Healthcare Network Accreditation Commission (EHNAC) is a voluntary, self-governing standards development organization (SDO) established to develop standard criteria and accredit organizations that electronically exchange healthcare data. These entities include accountable care organizations, electronic health networks, EPCS vendors, eprescribing solution providers, financial services firms, health information exchanges, health information service providers, management service

organizations, medical billers, outsourced service providers, payers, practice management system vendors and third-party administrators.

EHNAC was founded in 1993 and is a tax-exempt 501(c)(6) nonprofit organization. Guided by peer evaluation, the EHNAC accreditation process promotes quality service, innovation, cooperation and open competition in healthcare.
