

Healthcare IP Expands EDI Network in Partnership with Decent

Bringing people and products together to improve the healthcare experience.

Edmond, OK— February 11, 2019 — Healthcare IP today announced its partnership with Decent, a startup administering affordable, patient centered health insurance plans. Leveraging its Scale® EDI network, Healthcare IP will facilitate the secure exchange of health information between Decent and its providers, reducing administrative complexities and bringing transparency to the revenue cycle.

“It’s encouraging to see organizations prioritize patient experience in their operational strategy, but that’s just the first step. The overall effectiveness relies on the collective effort of all stakeholders. Placing extreme importance on the values of your business partners.” explains Brent Grimes, EVP at Healthcare IP. “As someone who works with health plans and care providers, it’s our job to bring people together and engage constructive conversation. This partnership presents an opportunity for discourse and display of what the patient-provider-payer relationship can be in healthcare.”

“Partnering with Healthcare IP has allowed us to enter the market quickly and with confidence. The folks at Healthcare IP bring decades of expertise to the table and have been invaluable collaborating partners in the development and implementation of Decent’s EDI strategy.” Ryan Scott, Operations Lead, Decent.

About Healthcare IP

Healthcare IP is an integrated partner of healthcare provider and payer organizations, promoting data transparency and user experience in the revenue cycle. Specializing in custom solutions with quality client service, we provide clarity and guidance through the complexities of healthcare data management.

About Decent

Decent, a startup administering affordable, patient centered health insurance plans to freelancers, is charting a new path forward for health insurance in America. We envision a world where everyone has the freedom to do the work they want without sacrificing access to affordable and comprehensive healthcare.
